

Enovate LEED®

Welcome to a fresh angle on green, where performance and sustainability are not mutually exclusive but rather the complementary result of good design.

By striving for simpler, more elegant design solutions, we excel in developing products that—compared to others in the same class—consume less of the Earth's limited resources thereby equipping hospitals to be part of a clean, green, sustainable future.

Virtually all Enovate products can help your project achieve LEED® certification – this also includes the invaluable Innovation in Design credit.

Leadership in Energy and Environmental Design (LEED®) is the nationally accepted benchmark for the design, construction, and operation of high performance green buildings. LEED® provides a rating system based on accepted energy and environmental principles, and they strike a balance between established practices and emerging concepts.

The recycled content of each product is a sum of the different materials making up the device. Enovate products contain no VOCs, uses Greenguard Certified materials, is compliant with RoHS/WEEE/ELV and uses EPP CPA Certified particleboard.

LEED for Healthcare
